**INTERNATIONAL PRELIMINARY REPORT
 ON PATENTABILITY**

International application No.
 PCT/GB2004/004937

Box No. I Basis of the report

1. With regard to the **language**, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
 - ☐ This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of:
 - ☐ international search (under Rules 12.3 and 23.1(b))
 - ☐ publication of the international application (under Rule 12.4)
 - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the **elements*** of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):*

Description, Pages

1-39 as originally filed

Claims, Numbers

1-14 as originally filed

- ☐ a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing

3. ☐ The amendments have resulted in the cancellation of:
 - ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):
4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
 - ☐ the description, pages
 - ☐ the claims, Nos.
 - ☐ the drawings, sheets/figs
 - ☐ the sequence listing (*specify*):
 - ☐ any table(s) related to sequence listing (*specify*):

* If item 4 applies, some or all of these sheets may be marked "superseded."

**INTERNATIONAL PRELIMINARY REPORT
ON PATENTABILITY**

International application No.
PCT/GB2004/004937

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	
	No: Claims	1-14
Inventive step (IS)	Yes: Claims	
	No: Claims	1-14
Industrial applicability (IA)	Yes: Claims	1-10,13-14
	No: Claims	11-12

2. Citations and explanations (Rule 70.7):

2. Documents D6 and D7 are not taken into account in the present opinion, since they have been published after the priority of the present application.

3. Novelty

The compound s6h, 6i, 6l-n, 6r, 15a-g disclosed in D8 and the compound disclosed in example 64 of D9 fall within the definition of formula (I) in claim 1 of the current

application. Novelty is not acknowledged re D8 and D9.

The compounds disclosed in D1 to D3 have been excluded from the claimed matter by means of a proviso.

4. Inventive step

The problem underlying the present application appears to reside in the provision of indole, indazole or benzimidazole derivatives useful in the treatment of respiratory disorders in view of their activity on the prostaglandin D2 receptor.

The same activity is disclosed for the compounds disclosed in D1 to D3. The structural difference compared to the current application resides in the fact that in D1 to D3 the carbon atoms of the benzo fused ring cannot be replaced by nitrogen atoms, while in the present application, it is mandatory that such a replacement takes place if ortho to the nitrogen of the indole a carbon atom is present, as defined in the proviso. D4 and D5 also describe compounds useful in the treatment of asthma; D4 discloses pyrrolo-pyridine and pyrrolo-pyrazine compounds, and thus teaches that the presence of nitrogen atoms in the ring fused to the pyrrolo does not affect the activity, while D5 indicates that the 5-membered ring may additionally contain a further nitrogen atom and that the acetic acid group may be attached to a nitrogen of the 5-membered ring. Since the skilled person would have arrived at the compounds of the present application by carrying out bioisosteric replacements in the structure of the known active compounds against asthma, no inventive step can be acknowledged in the absence of data which show unexpected effects for the compounds of the current application compared to the structurally closest compounds of the cited prior art.

5. Industrial application

Claims 11 and 12 are directed to a method for treatment of the human body by therapy.

6. Further observations:

- Claim 1 does not appear to mention the definition of X.
